FINAL SUBMISSION TEMPLATE

Student Information

Enrollment Number: IU2541230420

Project Code: CPP10

Project Name: Event Registration System

Final Submission Checklist

- ☑ Source folder with main.cpp and modular OOP classes (.h/.cpp)
- ☑ Data folder with persistent text records (events, participants, organizers, registrations)
- ☑ Use Case Diagram (use_case_diagram.png for Participant, Organizer, and Admin)
- ☑ Class Diagram (class_diagram.png showing classes, methods, and relationships)
- ☑ Sequence Diagram 1 (sequence_registration.png: Main registration transaction)
- ☑ Sequence Diagram 2 (sequence_cancellation.png: Registration cancellation)
- ☑ Working executable (Compiled C++ binary in Executable/Project)
- ☑ Screenshots (Screenshots/ demonstrating menu, operations, and persistence)
- ☑ README.txt (System requirements, compilation flags, and menu commands)
- ☑ ProjectReport.pdf (Comprehensive 15-section project report and test plan)

Final ZIP Naming

IU2541230420_CPP10_Project.zip

Final Verification

Run the executable from the Executable folder (or project root). Verify listing and adding events (options 1 & 2), participants with email validation (options 3 & 4), and organizers (options 5 & 6). Test the main transaction by registering a participant for an event (option 7) to confirm capacity limits, duplicate registration rejection, and seat count increments. Test registration cancellation (option 9) to confirm seat release. Finally, save and exit using option 0, reopen the application, and confirm that all updated records in the Data folder remain persistent across runs.
